

A perfect
day for you

Glossy
TEARS 

Driving under wet conditions can be dangerous. Aquaplaning, heavy traffic and, particularly, poor visibility hinder an activity which is already risky.

To **improve safety when driving under such conditions**, ISTOBAL has developed **Glossy TEARS**, a **water-repellent wax**, that creates a hydrophobic film on the windscreen. Furthermore, **gloss enhancers help protect the car's surface**, the vehicle benefiting from a higher gloss and better bodywork protection.

Glossy TEARS is available for automatic car wash and is **highly recommended in rainy seasons**.

From now on, driving under a stormy sky will not be a problem. **Glossy TEARS improves safety and visibility** turning **a cloudy day into a perfect day for you**.
