Aerothermal
heating boiler

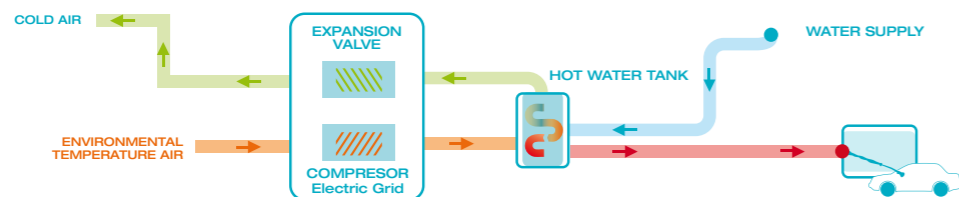

ISTOBAL
Sustainable jet washes

Sustainable jet washes

Progress also requires us to be environmentally aware. Based on this premise, **ISTOBAL** has developed a sustainable system for jet washes.

Our **aerothermal heating boiler** captures the energy present in the surrounding air and transfers it to the water. It heats the water efficiently, saving on production costs and achieving a very low energy consumption compared to traditional systems.

This innovative equipment incorporates 2 heat pump circuits that run in parallel to achieve low recovery times and maximize savings.

ADVANTAGES

- Easy to install.
- Energy savings between 60% -75%.
- Reduced equipment maintenance.
- Lower environmental impact. Renewable Efficient Energy, without combustion or emission of fumes.
- Heats water up to 60°C.
- Automatic anti-legionella disinfection.
- Large size display.

INSTALLATION

- Room temperature of the equipment $\geq 5^{\circ}\text{C}$.
- Tank of stainless steel 316L of 500 liters.
- Electrical power absorbed: 1,05 KW.
- Tank coated by an aluminum condenser
- Dimensions:
 - Width: 2,124 mm
 - Height: 785 mm
 - Length: 785 mm
